

The most energy efficient way to heat water just got smarter—now with the option to save even more money and get more peace of mind with built-in leak detection and optional automatic shut off valve.

Save more, worry less. The Smart Hybrid Electric Heat Pump can reduce water heating costs over 75%, saving more than \$600 per year on utility bills\* while qualifying for many state and local utility rebates.

How Do They Work?

Reliance® Smart Hybrid Electric Heat Pump Water Heaters absorb ambient heat from the surrounding air to heat water using a compressor. They have a self-contained heat pump integrated into the top of the tank and backup electric elements that can supplement the heat pump depending on operating mode, environmental conditions and hot water demand.

\*Comparing 80-gallon heat pump against pre-2015 similarly-sized standard electric using DOE EF to UEF conversion rates. Savings may vary.

Your neighborhood water heater source.

- 10-Year Limited Tank and Parts Warranty
- ENERGY STAR® qualifies for many state and local utility rebates
- Reduce water heating costs over 75%\*
- Annual savings more than \$600 per year compared to a conventional electric model\*
- Leak Detection immediately alerts you of a leak
- Optional Automatic Water Shut Off Valve shuts off water supply when a leak is detected (optional accessory)

- iCOMM™ WiFi Connectivity notifies and manages your water heater from your smartphone
- Smart anode adapts to local water conditions, protecting against tank corrosion
- Ideal hot water delivery for households with 5+ people when sized appropriately
- Side & top water connections and built-in duct adapters for ease of installation, zero clearance required
- Super quiet operation – 45 dBA, the quietest in the industry
- Long-lasting upper and lower backup copper heating elements
- Durable, tamper-resistant brass drain valve
- CSA certified and ASME rated temperature & pressure relief valve for safety
- Rated for 208 and 240 Volt power supply

\*Comparing 80-gallon heat pump against pre-2015 similarly-sized standard electric using DOE EF to UEF conversion rates. Savings may vary.

**EASY-TO-USE ELECTRONIC DISPLAY**

- User friendly, easy to read eye-level display
- Easily select operating mode: Heat Pump, Hybrid, Electric, Vacation
- Display communicates mode, set point, and displays service messages when applicable
- Vacation mode programmable up to 99 days

**HEAT PUMP MODE**

- Utilizes the heat pump for all water heating for the most energy efficient operation\*

**HYBRID MODE**

- Utilizes compressor as primary heat source, during periods of high demand heating elements will also be energized to provide supplementary heating\*

**ELECTRIC MODE**

- Standard electric water heater operation - utilizes heating elements for all water heating

**VACATION MODE**

- Maintains tank temperature at 60°F during vacation or extended absence, up to 99 days, to reduce operating costs and provide freeze protection

\*Automatically reverts to heating element only operation if entering air temperature is above 120°F, below 37°F or tank water temperature is below 55°F.

Uniform Energy Factor and First Hour ratings shown for Hybrid Electric Heat Pump units are based on operation in the Hybrid mode. Recovery Ratings shown for Hybrid Electric Heat Pump units are based on back up heating element performance. Hybrid Electric Heat Pump units are rated for both 208 VAC and 240 VAC single phase power supply.
